

The First Open Mind Alliance Christmas

We wish you Merry Christmas and a Happy New Year!

Christmas is a joyful time. It is specially the case for us – this is our first Christmas.

Indeed, we have much to celebrate. Since we started in May this year we have seen some phenomenal student successes.

In our senior group, a 14 year old student who has just been integrated into mainstream grade 9 science in his high school. This is so exciting because he was reading at pre-K level in May. He was in grade 8 then.

Our junior group is just as exciting. Our 3 and 4 years olds have started talking after only a few months of working with us. It is absolutely wonderful to see these children blossom. Each work session is now interactive and lively. Sometimes it is difficult to remember all these children had been non-verbal when they started with us.

As we move forward, we aim to help our children to tap into their rich potential so that they, too, can find successes in school and in life.

This Christmas we will celebrate our students' success and we wish our students and their families a joyous holiday season.
